

**If you are an English-speaking woman over the age of 18 and you have completed your primary treatment for breast cancer, or soon will, you are invited to participate in a research study on survivorship care plans.**

**COMPASS**

**CANCER OUTCOMES MANAGEMENT: PLANNING ASSISTS SURVIVORSHIP STUDY**

**COMPASS is aligned with the Lynn Sage Breast Cancer Survivorship Program.**

**In the study you will receive a written summary of your cancer treatment and personalized recommendations for your follow-up care after your initial survivorship visit. You will also be asked to complete questionnaires about your symptoms, health behaviors and satisfaction with health care, and to briefly discuss your cancer-related needs and concerns.**

**COMPASS will help us evaluate the impact of the Lynn Sage Breast Cancer Survivorship Program and learn about the best ways to provide patients with important information when they complete cancer treatment and graduate to the survivorship phase of care.**

**If you choose not to participate in COMPASS, survivorship services are still available to you.**

**If interested or for more information, please call Mallory Snyder, MPH at (312) 503-3487**
